Deputy Commissioners
Office
Shemoga District
Shemoga. Dates 3rd June/90

From
The Deputy Commissioner
Shemoga District

To
The Chief Secretary
to the Government
of Mysore

Sir,

I have the honor
to forward for the
favorable consider-
-tion of Government
the Proceedings of a
Special meeting of the
Shemoga Municipality
held on the 31st May 1890.

The roads necessary
on opening out the
unsanitary portion

of the town referred to in the Resolution have already been taken in hand, and good progress has been made with them.

Advantage was taken of a large fire in this quarter of the town which destroyed — almost all the houses in the objected locality — to get the owners to rebuild their houses in better drained places and along the sides of the roads — newly opened.

The Dewan's recommendation for improving the health of this part of the town are being carried out gradually.

The Government is, aware how badly off the Municipality of this large Town is as regards funds, and it will be shewing a great consideration if orders could be given for the work of opening out the locality being made part of the drainage scheme, and handed over to the Executive Engineer for Execution.

I have the honor to be
Sir
Your most obedient
Servant.

H. Marshall
Deputy Commissioner
Shemoga District

Proceedings of an Extraordinary meeting of the Shemoga Municipal Board held at the Deputy Commissioner's office in the evening of the 31st May 1890

Present

K. Nageshanow Esqr.
Vice President

The Vice President laid before the meeting a proposition (concurred in by the President and the Executive Engineer) to open — contain

certain new roads named in the margin* on sanitary grounds. The meeting are unanimously of opinion that the proposed opening out is urgently required as the localities are overcrowded and owing to the houses being irregularly built and placed in illventilated and water logged situation the place is chronically unhealthy, and is in source of danger to the other parts of the Town.

The accompanying sketch shewing the new roads and drains has been prepared by the Executive

*1. Road from the Sawar ground, the Barr Lines by the north of Traveller's Bun Marked x – W, lines in the sketch denote the length of the road to be new opened.

2. New road, from the road near Mr A. Sitanamappa's house to the main Bazaar, through Byana, Oochangi-Bedar Keri, Tigalar Keri and Anaverappa-nakeri, marked C. B and A. in the sketch.

3. From the road near Ramaprasad Jinani's Compound through Byana Dandina Agasar Ker to the front of Hiriya Makan

marked E-K in the sketch.

From Timmappana Koppal road to the main Bazaar Street through a portion of the Kumbargundi marked 4 in the sketch.

Executive Engineer himself and is made to fit into the general drainage scheme now being worked by him

The insanitary condition of these low lying tracts attracted the attention of the Duraan when he inspected the Town during his last visit in December 1889. He was struck with the necessity of properly draining and opening out this quarter. He was keen for removing the houses altogether, and building them on high lying ground A rough estimate has been prepared

prepared shewing the amount of Compensation to be paid to the owners of land to be taken up, and to the owners of houses to be removed in opening out this part of the Town as also for the land in which Sites will have to be granted in lieu of the houses to be so removed & together with the cost of constructing the roads. The cost is estimated at about 5000 Rs.

Estimate not Received

This is a large item for the Municipality to meet. The meeting resolve to request the Deputy Commissioner to kindly move the Government

2/

Government to be pleased to have the above work taken up by the Public Works Department as part of the Town Drainage and Kumbangudi projects.

There are some other similarly badly over-crowded and un-drained localities, — viz, Koombarkéni, Kéri-durgammanakéni, Makkikéni and J. Shanarayanakéni, but when the Executive Engineer takes up the general drainage work he will be able to adopt necessary measures to remedy the defects here also.
